Awards & Partnerships

CDW Canada is named the Number One Solutions Provider in Canada for the fourth year in a row

Cloud Planning Services from CDW

It is no surprise that Cloud Services are revolutionizing the way in which businesses operate, yet for many organizations, moving to Cloud can often be an overwhelming task.

It's important to have a clear view of your current IT environment to avoid roadblocks. Challenges may include not knowing how to identify which services are suitable for Cloud, where to start or what the risks and pitfalls are. Limited internal resources with proper Cloud certifications can also be a roadblock to successfully complete a solution.

CloudPlan helps you through each stage of moving to a Cloud delivery model, from initial steps to a fully implemented service.

CloudPlan incorporates six distinct stages designed to get you up and running in Cloud. Using the most effective manner that was designed as a new and innovative approach to Cloud delivery. CloudPlan does not rely on traditional or legacy steps in which many other services use today.

How CloudPlan works

CloudPlan works by leveraging a mixture of modern tool-sets combined with skilled and qualified consultants - which have extensive experience and capabilities to deliver a Cloud Service outcome. Select the engagement you require assistance with from the following stages:

- Discover & Assess
- Design & Plan
- Implement
- Migrate
- Operate
- Transform

The first step will be to meet with a Cloud planning consultant who will work with you to explain the procedure and begin the CloudPlan process.

Is CloudPlan right for your Organization?

CloudPlan is best used when you want to develop a progressive and clear view on how to move to a Cloud solution.

- Do you have a desire or business objective to adopt Cloud Services?
- Are you having trouble knowing where to start?
- Do you need help building a business plan and identifying the costs associated with Cloud?
- Does your IT department have a wide range of certification and Cloud Services knowledge?
- Are you looking to augment your internal capabilities with a trusted IT services partner?
- Do you want to reduce risks associated with the complexities of Cloud migrations?

Global Reach

Our International capability means that no matter where your business operation resides we have presence in those locations to assist.
